

Rent A Tag™

TRANSPONDER MANAGEMENT PROGRAM

Time is Money

Rent A Toll, the premiere provider of electronic prepaid tolling solutions has announced its newest tolling solution - Rent A Tag. The Rent A Tag solution is designed for the company looking to effectively manage their toll expenses, reduce costs and improve the driver experience by utilizing our turn-key toll payment solution.

In this era of higher fuel prices, tightening deadlines, and shrinking margins, decreasing the amount of time your vehicles spend in toll booth lines is an obvious way to speed deliveries or increase sales calls and ultimately, make your company more profitable. Toll roads, bridges and tunnels throughout the United States and beyond, are moving towards business models which use electronic toll collection or open road tolling methods of collecting tolls. Many newer toll facilities are also phasing out the option for drivers to pay cash at the toll booths.

Electronic toll collection and open road tolling collect tolls electronically instead of manually collecting cash at toll booths which requires vehicles to stop to make a payment. These roads or highways are typically less congested and therefore enable your drivers to reach their destinations faster and more efficiently.

The Problem

Fleet managers focus their time and resources on reducing fleet costs and increasing utilization – not on tolling issues. Drivers often fail to understand the financial consequences of the violations as they focus on travelling safely and efficiently. Many fleet operators have designated toll transponder management to the primary driver of the vehicle, but violation exposure ultimately resides with the company. Toll violations can occur for a multitude of reasons. These violations can incur costly fees and penalties which can add up quickly. Rent A Toll's Transponder Management Program eliminates this cost.

Problem Solved

Rent A Tag's Transponder Management Program can save time, improve cash flow, and assist in managing and reducing toll expenses. Additionally, we will professionally manage the purchase, fulfillment, funding and replacement of transponders. This eliminates the burden on fleet personnel to monitor the whereabouts and status of toll transponders, fund the accounts, and spending valuable time and resources sorting through hundreds or thousands of paper violations.

Call today toll-free at 877-509-9506 and request a free cost estimate on a Transponder Management Program for your fleet.

“Decreasing drive time is the most obvious way to speed deliveries and make your company more profitable.”

Rent A Tag™

Transponder Management Program Benefits

- Eliminates all toll penalties and fines
- Reduces administrative resources used to review violations and process payments
- Eliminates upfront capital costs required to purchase transponders and prepay tolls
- Eliminates the monthly transponder rental and bill statement expense for clients currently managing transponders on a corporate or individual driver basis
- Eliminates vehicle registration holds that result from unpaid toll fines
- Consolidates all toll cost onto a single monthly billing statement to simplify internal accounting practices
- Provides enhanced reporting and transaction usage
- Eliminates the need to manage toll expenses on a personal or company credit card
- Reduces travel time and increase driver safety
- Reduces a company's carbon footprint
