

RENT A TOLL®

TOLLPORT™

VIOLATION AVOIDANCE PROGRAM

The Challenge:

The proliferation of all-electronic tolling and cashless methods of toll collection have caused fleet managers to re-evaluate the way they manage toll violations. As a result, many fleet managers and third party leasing companies have taken action to reduce toll-violation costs and reduce overall fleet vehicle violation expenses. The solution they have found is Rent A Toll®'s Tollport™ program.

Tollport™

Tollport™ is a toll avoidance solution that insures all tolls will be paid when a driver has an unscheduled toll event or their personal transponder is not working correctly, underfunded or not in the vehicle at the time of the transaction.

All tolls are paid by Rent A Toll® before they become toll violations, and Rent A Toll® guarantees toll payment for fleet vehicles that are registered in the Tollport™ program.

Participating fleet managers will receive a weekly invoice of consolidated toll charges by the participating toll agency that can be uploaded to their fleet management system or billed directly to the responsible driver. This process allows fleet managers to eliminate costly toll penalties, fines and legal fees when their fleet vehicles are enrolled in the Tollport™ program.
